

Help start the **COUNTDOWN TO ZERO** by using this free stencil,
brought to you by Global Zero, Participant Media, and Magnolia Pictures.

1. Print image on 8.5x11in card stock. 2. Use your favorite X-acto knife to cut along the dashed lines. 3. Spray your stencil with clear acrylic spray. This will make your stencil last much longer and keep the cardstock strong. Feel free to let it dry, and coat it again five or six times. 4. Paint the town! (or just your stuff). We like to spray a patch of yellow first, then lay down the stencil. Not only does it look super cool, but keeps the stencil stuck to the tacky surface. Go over the stencil in black, and if you're feeling extra creative, add a dash of blue over the earth and the GZ logo 5. Keep your stencil clean so your lines stay lookin' good. Nobody likes a careless stenciler!
